WHAT TO DO WHEN YOUR PLANTS ARRIVE

You may not have time to put your plants into the garden immediately on arrival, or the soil may be frozen and not fit for planting, but please do not leave the parcel unattended. Like all travellers the plants need rest and refreshment after the journey. Open the box and stand them upright with packing loosened, to get a little air. If they have been several days travelling they may be dry. Plunge each one into a bowl or bucket of water until the bubbles cease. Put to drain, standing plants upright. If the soil is dry, water the hole well before planting, and then water well again after planting. Apply a mulch if possible to conserve moisture.

If some time must elapse before planting check the plants frequently making sure they are neither too dry nor waterlogged. Keep in a cool, light outhouse or heel in at the foot of a sheltered wall.

COMPLAINTS

We will deal promptly with complaints if they are made within 14 days of receipt of plants. As a general rule we cannot offer free replacements, unless the plants have been unduly delayed, or damaged in transit. However, we prefer to have satisfied customers so our few complaints are dealt with considerably. Please examine the parcel contents carefully for credit notes, lists of plants unavailable, etc.

If your order arrives badly damaged, plants possibly missing, please inform us immediately, please keep damaged packages until you hear from us.

GIFT TOKENS

If you wish to send a worthwhile present for an Anniversary, Birthday or for Christmas we will provide our Token Card (together with a free catalogue), to the value of the cheque sent. (Postage and packing is payable when Gift Tokens are redeemed for plants sent by Mail Order.) We regret we cannot accept tokens other than our own.

FRIENDS OF THE GARDEN

By popular request, we have a 'Friends of the Garden' scheme for regular visitors. A 'Friends' ticket could also make an original and acceptable gift. Subscriptions may be purchased on an annual basis for £10 per single ticket, or £15 for a double ticket to admit the card-holder and a guest of their choice. Admissions to the gardens will be unlimited (within our hours of opening) but tickets will not be transferable and the card-holder must always accompany any guest. Please send a cheque for the appropriate amount or telephone us with an Mastercard, Visa or Switch number.

'MY GARDEN' – OUR FIRST VIDEO

Beth Chatto tells the story behind the making of the gardens, explaining how, through her knowledge of the natural association of plants, she has converted problem areas – those too dry, too shady, or too wet – into a series of gardens with totally different characteristics, by grouping plants adapted by nature to these seemingly difficult conditions. A quiet and relaxing video with beautiful footage capturing some of these groupings and overall the peaceful atmosphere of the gardens.

Price £14.99 plus £1 postage and packing.

'SIGNED COPIES OF LIMITED EDITIONS'

Under this title we include plants which are scarce and cost more because of the time and skill needed to propagate them. Some take several years before they are saleable, i.e. *Paeonia mlokosewitschii*, *Veratrum album*. Others need more time for us to grow larger stocks of mother plants than we have at present, so the number of cuttings or divisions we can make are limited. Some mother plants do not make up quickly however well they are treated.

As demand can exceed supply we advise you to order early anything you need from this section, to avoid disappointment. Such orders must, of course, be within our terms of business (see page 4). We apologise to those who may be too late.

We have many unusual plants available to personal callers to the nursery, which are not listed in our catalogue. Do come if you can, to see our full range.

Dear Customer

As yet we have not been affected by the devastating outbreak of foot and mouth disease. Like most country people we carry on from day to day, hoping fervently the restrictions and frightful slaughter will eventually contain the disease. Meanwhile my staff and I extend our genuine sympathy to any of you reading this letter whose livelihoods are in jeopardy. While there may be no spare cash for new plants, we hope you will find some consolation in seeing the return of old plants, comforting as old friends.

Few people who know the garden here would imagine we could grouse about the rain, but during the past twelve months we have had 36.08 ins of rain, an unheard of total in these parts. Our average annual rainfall over the last fifty-two years has been 20.45 ins during which time we recorded less than 15 ins in three separate years. Normally, summer droughts are our problem. We can understand the dismay of visitors who have travelled far to find we are having one of our rare wet days, when wind and rain ruin the silky petals of iris or poppies, but for gardens in Essex, summer showers are a blessing. With our light land, last summer's total of 12.56 ins (from April to October) was not a problem. This past winter (October to March 2001) we had 23.52 ins!!, more than our average for a whole year! The ponds in the lower garden overflowed, flooding adjoining borders, and the lawns too, which remained so soggy, we were obliged to close that area of the garden. The Gravel Garden and the Wood Garden were accessible and do not appear to have suffered as yet, being on free draining gravel and sand. The coming season will show what benefit (or harm) trees and shrubs may have experienced from the exceptionally high water-table.

Over the past two years I have been concerned by the sudden growth of trees and shrubs, extending alarmingly in some areas, excluding light, or, smothering neighbours. The garden was becoming elderly, (like its owner), who now must learn how to maintain the garden, my late husband and I began forty years ago. So, a vigorous pruning programme has been carried out this past winter, to open up new views and re-juvenate old plantings.

But, like many of you perhaps, we are behind with replanting, especially perennials, because the soil is still too wet now at the beginning of April. I am not too worried, I prefer to see what I am planting; rather than bare balls of roots.

Our Tea House was much appreciated in its second season, providing somewhere to rest and unwind, with home-made refreshments, - or maybe try to identify the little pots of flowers which Emily arranges throughout the season on all the tables. For those who like to bring a picnic to eat in the grass car park, Gerard and Ben have made extra tables and benches. All my team, both named and un-named work well together throughout the year, to propagate and care for our plants and garden, for your pleasure, and our satisfaction in doing a good job as well as we can.

In common with everyone else we have been subject to continually rising costs for several years, in spite of which we have kept our prices static since 1998. This season however we have been obliged to make a modest increase in our plant prices which we hope our customers will find reasonable.

One of the main rises in costs has been in the area of road haulage. Here however we have decided to keep our post and packing charges unchanged at £6.50 on orders up to £65.00, and at 10% of the total cost of plants on orders up to £1,000.00. Unfortunately we have had to make a few exceptions, and these are for Northern Ireland and the Highlands and Islands of Scotland. (A separate costing sheet is available on request from the office.)

May caring for your plants bring you good health and peace of mind.
